DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. In claim 3, the phrase "the combination double hook and easel flap" lacks antecedent basis.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the back having a means for inserting and removing a picture without removing the back as recited in claim 5 is not supported in the specification.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lemire, U. S. Patent 6,405,466. Lemire teaches a self-leveling and convertible picture comprising picture display device 21 composing a flexible cord 15 forming a plurality of adjustable interconnected hanging loops 16 and 17 for slidably engaging a double hook 20a and

20b affixed to a wall. The picture display device 21 has a picture back 1 configured to be attached to the picture display device. The back has a series of apertures 6-14 there-through in which the flexible cord 15 is threaded, wherein the cord 15 is affixed to the back at at least one end 15 thereof and forming the adjustable loops between pairs of adjacent apertures such that the loops are used for engaging the double hook affixed to a wall.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chilcote, U. S. Patent 2,172,273. Chilcote teaches a picture mount having a back 3. The back has a door 3^h for inserting a picture into the picture mount. It would have been obvious to one having ordinary skill in the art at the time this invention was made to provide a means to insert and remove a picture without disassembling the picture mount.

Allowable Subject Matter

5. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 3611

6. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
